Banner – Colorful, VIP logo or Just-In-Time Intervention

Enter Button - Takes you to the grade prediction page.

Text for home page –

Welcome to the Just-In-Time Intervention web app! The purpose of this website is to use data-driven techniques such as machine learning and statistical analysis to provide you (the student) with tools that can help you succeed in your classes.

Specifically, in the <tab_name> tab, our model can predict your final grade in this class, based off your performance so far. It'll help highlight your strengths and weaknesses, so you can see what areas you're doing well, and what areas you might need improvement.

Additionally, the <tab_name> tab contains some useful plots that can provide some general, interesting insights into what it takes to succeed in this class.

Furthermore, in the <tab_name> tab, our model can also predict how likely you are to finish this class, going at your current rate.

Thank you for visiting, and please reach out with any comments or suggestions @ https://www.vip.gatech.edu/teams/data-driven-education.
